

CellFlo6®

P17391

CellFlo6® represents more than an adaptogen; it's a versatile, scientifically backed solution that aligns with the multifaceted demands of modern health-conscious consumers.

From supporting the body's key operating systems to innovatively enriching functional foods and beverages, the broad spectrum of benefits CellFlo6® offers resonates with diverse consumer needs. Its natural origin, versatility across product formats, and scientifically backed functionalities position CellFlo6® as a perfect fit in the adaptogen marketplace, poised to lead the way in wellness innovation.

Galloylated procyanidins, the revolutionary and patent pending oligomers of CellFlo6®, serve as nature's body armor for plants, protecting against sunlight, predators, and insects. This natural protection system is a compelling metaphor for the human body, suggesting that what protects nature can also shield our own biological systems.

By harnessing these compounds, CellFlo6® brings nature's protective wisdom to human health, offering a synergy between the plant and human worlds that resonate with a philosophy of holistic well-being.

The Science of Adaptogens and Cellflo6's Uniqueness:

Adaptogens, including CellFlo6®, help modulate the body's response to stress, supporting resilience and balance. CellFlo6®, enriched with galloylated procyanidins, goes beyond traditional green tea extracts, offering a spectrum of health benefits.

Natural high performance green tea extract

Suitable for dietary supplements (i.e. powder blends, capsules and tablets) and food & beverages.
